Sent	04/15/2026 8:15:46 PM	012345 6789	A lot of folks are thinking the Iran war was a necessary reaction to stop nuclear war. In the recent past when a Palestinian murders (gehad), bombs Israeli civilian citizens, they are pursued, prosecuted, and put away in prison. If the new Israeli law, that west bank Israeli (vigilantes) can officially not be prosecuted for crimes against Palestinians, if the law passes, and even if not, I realize Westbank settlers have harassed and murdered with some impunity of prosecution, much like the US south did in a number of ethnic cleansing and hangings of blacks. This is wrong, unAmerican, and the product of bad government, just as the atrocities attributable to ICE. So, it will be remembered by many. One needs to ask: What has been accomplished in the Middle East by Hamas-Gaza war, the Lebanon war, and Iran war? Has Hamas been nutralized in Gaza? As of today Israel is negotiating with Hamas about turning in Hamas weapons which they refused to do. It is likely that Hamas will work to secure resources in the future and resume its fight against Israel. Soon Israel and US will be right where we started before the war started, except for the destruction of property and wealth. In Iraq war, there was not any nuclear, biological, chemical weapons found, so the US stated goals to rid Iraq of nuclear-chem-bio weapons was also proven to be false. In Iraq case and Gaza-Hamas case one could say Israel had a right to stop missiles and other attacks on its own land and civilian targets. For Iran, even though Trump administration claims Iran was about to attack US with nuclear weapons, like the Iraq war reason, there was not a nuclear weapon that could effect US. In fact, a week before, Trump administration claimed it had ended the Iran nuclear program, having been bombed by US and Isreal. All the information comes from news and internet sources. What do Gazans, Palestinians and Iranians say? It is their claim Israel land is their (arab) land and all on it should be pushed into the sea, that is what they say for the last 50 years.
Sent	04/12/2026 2:51:40 PM	012345 6789	The word crimson in above was placed by the speller-editor...

Sent	04/12/2026 2:48:51 PM	012345 6789	The Iron Dome was primarily developed by Israeli defense firms Rafael Advanced Defense Systems and Israel Aerospace Industries . And .. The U.S. acquired and deployed actual Iron Dome batteries from Israel. I am sure that US paid good \$ to secure American facilities for Iron dome or equivalent production of expensive missiles and Ocasio Cortez does not say to stop US \$ to itself (US) or Isreal to purchase such for itself or own use. Everyone should agree that vigilantes taking the law into their own hands and official acquiesce to crimson of harressment or murder on west Bank should not be official policy of Isreal government, and to have immunity from murder of west Bank Palestinians by Ireali settlers, only in west bank, which is law being voted on in Kenesit yesterday (did it pass?), is wrong but thatis the state of things even though a court will need to weigh in on constitutionality.
Sent	04/12/2026 2:41:33 PM	012345 6789	Representative Alexandria Ocasio-Cortez has moved to oppose U.S. funding for Israel's Iron Dome as part of a broader pledge to block all military aid to the country, citing human rights concerns and a desire to hold Israel accountable for actions against Palestinians. She argues that a wealthy nation should fund its own defense and that U.S. aid should comply with international law. [That now seems reasonable, we should reserve our expensive and high technology for Defensive use like in Ukraine. Instead, we give Iron Dome to Isreal and starve Ukraine of aid.]
Sent	04/12/2026 2:39:55 PM	012345 6789	Must be that this is Trump hyperbole or it is Trump being all over the place. That makes such policies OK. It is OK for Iran to have Tolls so long as we kick back some to Trumps campaign for Republican policies like ways to stop Democrats from voting and enhance republican successes by gerrymandering.

Sent	04/12/2026 2:37:06 PM	0123456789	Jonathan David Karl who sent or reported this Trump posting is an American political journalist and author. Karl has covered the White House, Capitol Hill, the Pentagon, and the U.S. State Department... [This showed up on the news this morning. Trump supports the toll if he gets a cut.

Sent	04/10/2026 8:52:48 AM	0123456789	With pomp and circumstance Melania Trump held a news conference. She doth protest too much. Who cares about Melania and Maxwell when the price of gas is through the roof? Why would anyone be interested in her stated "unspecified allegations" (i did not hear any) when Iran still possesses 970 pounds of highly-enriched uranium and now has more motive than ever to turn it into nuclear weapons? Besides, there hasn't been the faintest whiff of scandal about the relationship between Melania and Maxwell, let alone Epstein. The bigger news is the tolls now paid to Iran by tanker ships and shippers for reparations from the 10,000 missiles and bombs exploded on Iran's infrastructure. Folks fail to see or feel what it is like, the impact of war destruction on civilian targets in a nations homeland. Blowing up military targets like that containing enriched uranium is a separate matter. Consider what it was like when missiles, 2 of 4, in the form of commercial jets, destroyed the world trade center buildings. The Saudi government has consistently denied involvement and is currently fighting massive civil litigation in U.S. courts, started close to 25 years ago. The arc of justice certainly takes the slow route. In August 2025, a New York federal judge denied Saudi Arabia's motion to dismiss the lawsuits, clearing the way for a public trial. No other countries paid reparation dollars to US, but that did not stop US retribution in Iraq, twice, or Afghanistan. Following the 2003 Iraq War, the US did not directly receive cash contributions from other nations for the invasion. In the 2003 Gulf War, the U.S. managed and spent billions of dollars in Iraqi oil revenue and seized assets, with the Federal Reserve flying billions in cash to Iraq to support reconstruction, start a stock market, and pay local authorities. Contrast this with the United States receiving roughly \$54 billion in cash and in-kind contributions from allies to offset the \$61 billion cost of the 1991 Gulf War. Half the reconstruction for world trade center, 9/11 disaster came from insurance, US and world companies, and as much from federal government, with 5% from charity. Iran's source of reparations is coming from shipping tolls so all countries are paying for Iran's destruction and deaths, including US through the increased cost of gas, fuel fertilizer, plastics, shipping and airline tickets, medicines,...
Sent	04/09/2026 11:32:59 AM	0123456789	Like the farmers that are unhappy, to be closer to bankruptcy from increased costs for fuel and fertilizer along with all Americans who pay for gas, medical stuff, and groceries. When interviewed, Magats still will vote for Republicans and Trump. Nice guy and good tipper, that Trump must be, to continue to be supported like in Majore Taylor Green's district where Trump was on the line, supporting the candidate that won. Those folks, in a poor NW part of rural

			Georgia say they are concerened, unhappy, and they dont support some of the stuff Trump did but they will still vote for him. Lucky that independents and moderate replublican say they will not vote for Trump. Before the Iran war, gas cost was close to \$3/gal, Trump lied when he said it was \$1.93. Now everyone pays between \$4 and \$6 per gal. So all cost go up for every one because Trump needed other news beside Epstein files who Trump thinks his supporters will think ill of him for fucking teenagers and thinking it is fun to piss on a hotel bed where Obama stayed with prostitutes in Moscow. Trump is nice to acolytes but turns out to be mean and cruel to patriots who think differently or disagree with Trump. It is past time to re-impeach Trump or invoke article 25 declaring the dementia and insanity that Trump has. Either that or an assassination attempt unlike the one during WWII on hitler which failed. Even Magats like Meagan Kelly think Trump's callas calls for killing the civilization of Iran cross the line. Trump supporters should be happy with innocents, like immigrant familes, who are legally in US with green cards, landed immigrant status, or waiting for asylum hearing, or from Puerto Rico (surprise, they are citizens and can vote). Trump should be impeached and jailed for that alone and ordering killing of US protesters, prosecuting others who ruffle his feathers from Steven Cobert to folks doing their job, like prosecutors and whistle blowers. Trump has wreaked US health care, education, science, reduced the wealth of 99 out of 100 citizens, and raised prices for everything. Trump, Republicans, and Magats, facing bad polling, is ready to take over elections and declare itself winner like it tried to do when Biden won with Jan 6th attempted coup. Trump's and republican current project is to keep democrats from voting. It is a race between falling political polls against how many disgruntled voters can be stopped from voting. Counting on Elon Musk conducting a "silent" or "bureaucratic coup" to take over U.S. government functions, and supporters in Supreme Court and military who will carry out the orders of a dictator.
Sent	04/08/2026 9:21:35 AM	012345 6789	I have often ranted about "investment income is taxed at lower rates than wages — and because the wealthiest often find ways to defer or avoid those taxes altogether" as this is tax time the burden of paying taxes has shifted to the middle and lower wage income class from the wealth class. The above quote comes from an AI article in the NY Times, that adds "Right now, the fruit of our labor is taxed at rates up to 37 percent, yet the tax rates for investment income top out at 23.8 percent" which I mention as corroboration of past rants where i have paid the higher rate. I also read that Elon Musk has a charitable, his is called Musk foundation. The corporations, are called 503C after the

			section of the federal tax code law that does not tax such entities. Churches use this section of the tax code as they are not taxed. Turns out "Reports noted that the Musk Foundation failed to meet the IRS requirement to distribute at least 5% of its assets annually, with reports suggesting shortfalls since 2021. So Elon puts \$ tax free into Musk Corp and then can direct its finances/income to do anything he asks with the assets, tax free. I checked with the IRS on this and found that such foundations like Musk's and the catholic church are allowed this OK nod after passing muster with the IRS. A while back some republic packs claimed the IRS had been denied such status and even though they were political PACs they claimed their works were not political because they support issues not candidates. The IRS accepted that view and political contributions to them and any income is not taxed. However, my foundation would not be looked on with such favor. That is my foundation would not be allowed in this interesting club as I would be using it as a tax dodge or is that DOGE.
Sent	04/08/2026 8:40:03 AM	0123456789	Continue the rant.. The crop insurance works like this: Farmer lays done a premium to have his crop insured for a certain struck price according to futures market price in that crop. Their are 4 climate categories, say if the crop can be damaged by flooding or drought, the 4 climate categories are 1=drought, 2=not to bad dryness, 3=not to bad flooding, 4=bad flood. The farmer has already been paid for crop that has not yet been planted, it is like a loan from the bank and the Insurance company pays the farmer for the crop if the crop fails, either number 1 or 4 comes up. A farmer gets nothing for 2 or number 3, the not to bad weather. Not all farmers get crop insurance. One told me he had an extensive farm enterprise and paid insurance for crop hail damage for 15 years but never needed the insurance. So he dropped it and his crop was ruined by hail. He told me he now sells crop insurance and is no longer a farmer.

Sent	04/07/2026 4:49:12 PM	0123456789	And the rant goes on ... Some thing should be said about another (already) costly war in Iran in terms of I (we) told you so. Farmers worried about bankruptcy are complaining about increased cost for fuel and fertilizer. They mostly vote republican and voted for what is happening. As they negotiate with banks and insurance companies for crop climate insurance. Here is how that works as I met the crop insures when they have their conventions, one year in Chicago and I was invited back for a talk in Las Vegas. They, the insurance lobby organization holds the convention every year. I was there because I created the NOAA data servers with model prediction output with archives and the insurance companies could get atmospheric data for their accrual tables.
Sent	04/07/2026 8:45:38 AM	0123456789	... the rant continues... In the US, common knowledge is that there is grade inflation in public and private (charter) schools and universities. At the same time, we give an "A" grade today for the work done when we were in school of a "B" or "C". Even the fucking (Trump used that word today officially referring to Iran leaders so I can too) drivers test is dumbed down and the road test is done in a MVA parking lot using orange cones for streets and parking, and driving with no interaction with other drivers on public roads. This, the deterioration of US schools and education, has been going on since the Reagan administration but has been getting worse each year since. It is the reason their has been pressure to make (segregated and religious) charter schools. I have seen charter schools produce students who only know chapter and verse from Bible memorization, and believe that prayer literally solves their problems. Take the public praying of Secretary of War (defense) Pete Hegseth, instead of planning tactics for the obvious closing of shipping channels for oil and fertilizer. I have had students say beginning 25 years ago, that if they needed the weather to not rain, all they had to do was pray for it, and God would answer their player, and that day it would not rain. That was written as answer to a question in my Meteorology course when I was teaching at a college. It is not a one off, I maintain the education system in the US has been dumbed down. Near the Nation's capitol, parents had removed the book Hukelberry Fin from the Mark Twain school library. It was some years ago and later reinstated. But, in Kansas, and red states, school libraries have been forced to purge or burn books by conservative magats trying to control free thought or wokism. In addition, the curricula has been dumbed down, especially at college level and public schools. Universities and colleges have remedial programs to (cope) teach arithmetic and algebra or how to write a paragraph for many students, leaving about 5% of the student body to work at real college level, so called,

			honors programs. This is what the Magats voted for when they voted in their racist and evangelical representatives who have now cut, demolished, and closed the US Department of Education. That is what the Magats voted for, that their own children to be dumb and dumber. For the Magats it's working, segregation has returned, separate and unequal. Magat children make great pastors and evangelist income or contributions has never been greater to the Republican party than now. Today, the guy who runs disaster relief for federal FEMA claimed he was religiously "moved, by forces beyond his control, dozens of miles from two different starting points in Georgia." Adding, "Teleporting is no fun," he said on the podcast "Onward," which is hosted by a conservative activist." For those Trumpists who are pushing for a Christian nation it might work out, they can fill the vacated federal civil service science job openings required to enforce a Christian nation where only male Republicans are allowed to vote.
Sent	04/07/2026 7:16:46 AM	0123456789	Inefficient, and overpriced, is what Trump called NASA today, while ships circled the moon. For civil service scientists, medical researchers at National Institute of Health (NIH), USAID, Voice of America, weather service, NCAR, Oklahoma severe storms lab, all closing, lost employees, with budget cuts, firings of scientists and staff research workers, with mail, letters, that say they are fired for bad works. What did this vast grouping of patriotic and conscientious nerds ever, any of them, do to deserve the unjust treatment from someone whom they have never met. America gives up its scientists, its science endeavors and participation. Now, Asia, Europe, the rest of the world take up the science and engineering discovery mandate. It used to be, why go study anywhere else than the states with the best facilities, best people to learn from, the place of new discovery, now is Asia and Europe. The place to go for fusion research is France, which holds the record in sustaining fusion. In medicine, genetic research happens in Europe, or climate, quantum physics and computing, and in China for solar cells and EV. The Chinese EV called , BYD, cannot be purchased in US but its specs beat all American and other Asian models and is less expensive. When we were in school, no one went outside the US for study, but now every US school has an overseas semester program, and students take advantage of it with multiple semesters of overseas education. Why is that even a trend. It is the dumbing down of US education, as the Republicans make the magats dumb and dumber. How did brain drain work in Russia? Remember the term refusenicks, scientists in Russia who were (not for) against the government were (finally) allowed to leave the then soviet

			union instead of off to the gulag. Russians who were nuclear scientists and others came to the US and contributed their talents in other subjects like AI. China's cultural revolution sent any thinkers to rural places where they starved or lived subsistently, none of them pursuing science. The remaining brain trusts then caused famine and corruption by government induced agriculture failure. There was a period when Russia and China needed to buy grain from the US. ...
Sent	04/04/2026 4:00:33 PM	012345 6789	What does it mean when the (vicious) right and Trump say that Democrats are socialists and communists. A free lunch – for school kids is not communism. In the US, the (republican right Trump) state has captured almost all of the media. The result has been that most republican voters think Trump won the Biden election and US won the Iran war, and Democrats are traitors. (I believe) US used Air Force to bomb mostly military targets, like missile launchers and radar, but also in the some 10,000 missile and bomb hits (white house reported that many) and from news images, civilian residences and structures as well as hospitals were also damaged with civilian loss of life including families, upper management and Iran ruling class. Include in this collateral damage the infrastructure destroyed where civilians live and work. Civilians lost their homes, cars streets, etc and insurance does not pay off for thousands of homeless or families that have lost everything. After Vietnam, Iraq and Afghanistan wars there were no reparations for US actions, lose or win. Some small amounts for a civilian or 2. None for Korea but Instead of reparations there, the U.S. provided billions in economic and military aid to South Korea to rebuild its infrastructure and economy, which was a strategic move to contain communism in Asia. That was a good idea, and as good as the Marshal plan for Europe after WWII. Let's digress and think of the communist danger? or scare? of the last 100 years, and was it warranted then or now. S. Korea is an example. But Vietnam was unnecessary as we lost that war, the dredded communists took over, US failed in its objective to save Vietnam from communism. But Vietnam, instead of a falling domino turned out to be the largest trade partner of US for asia.
Sent	03/29/2026 6:41:20 AM	012345 6789	I am not sure, but I don't believe that artificial Intelligence, AI, will take over blue and white collar jobs, rendering job loss and disruption to society. Of course I complain regularly that the US has abrogated its role in supporting sciences and given it over to private sector business interests, a good way to end truth seeking, and progress, unless there is profit. A good example of this is in Meteorology, which I know something about, where private industry was glad to

			receive windfall profit from federal (taxpayer) funded satellite projects for weather observations. Industry has shied away from weather prediction modeling. Recently, this may change with AI approach, but the future of AI weather prediction is unsure. So far AI misses outliers, the rare severe storm, which is what weather prediction is about, and the solution of complex nonlinear dynamical equations (Navier-Stokes) represent the physics of the system including oceans. Relating the matrix of observations now with past senerios through statistics (neural networks) is the AI approach. But I digress. Elon Musk and his companies monopolize the satellite industry and send more satellites to space than NASA does. He and members of the Silicon Valley leadership class feel that "artificial intelligence" is around the corner. If you believe that, then you believe that in the very near future, most people will be thrown out of work. They will be designated as social surplus, and will no longer have the leverage to exert influence on the direction of society. So the 90% lowest wage earners will be out of society, won't vote. In that case, you don't need their consent. So they (republicans) think.
Sent	03/26/2026 8:53:39 AM	0123456789	When I was a student, I did not realize that I could have been the greatest, most prolific scientist ever if I had lied about everything with help from like minded supporters. Persistence with conviction and crazy assumptions would have made my name in all the text books and monuments. For example, I could have said the speed of light can be surpassed and therefore we will be able to visit and meet aliens for mankind benefits. If only a body of scientists would continue to praise my every word and pronouncement. I would say, "19 scientists agree with me, and therefore, I am right." (Yes. He said that in the debate with Hiliary or was it Biden.) But science is a process. Anything can be put out there, like I encountered Aliens from another planet, communicated with past life/history/religious characters or cold fusion. Unless what I did is repeatable any number of times by anyone who wants to verify it anytime, it does not become part of the science body. Usually, nations support science as it helps the local civilization with improved engineering resulting from new and tested theories. From electricity, nuclear, cosmology, weather modeling, we get cell phones, tv's and washing machines, and prediction of the unpredictable. A better world where we can feed 8 billion. The life improvement from the scientific method is clear to me and shows that a process that projects self correction irrespective of who is doing the deed. We may celebrate Eienstien or Lorenz, but it is General and special relativity that is important and Maxwell's equations that say "let there be light" and enable circuit design, and everything

			else. It is the process, not leaving belief to one's whim or fancy or agenda that allows progress, and provides that fundamental theorems are correct and mistakes are removed. The ethical and moral compass is directed by checks and balances for with people, absolute power breeds absolute corruption. Otherwise, how does one know what is true and truth. A good example from history is the slow acceptance of heliocentric cosmology from after Christ was born until the renaissance. We know about Copernicus and Newton put in jail for proclaiming the Sun, not Earth, as the solar system center but the church believed better and ruled the world. Progress and the arc of science and moral universe is long, but it bends toward justice, only because of consistent scientific method applied to everything science. It is application of checks and balances, attempted for civil and political thinking, first applied in the US constitution, that makes moral and ethical progress possible. When it becomes about the man and not the process then justice fails. Justice, like utopia are concepts that give us a test or direction for political design making, and direct a moral compass. We will never achieve utopia or complete justice but checks and balances is a way to set the direction for our effort. This is how we know the Magats are wrong and the tag is propaganda.
Sent	03/26/2026 1:11:16 AM	0123456789	I remember Trump 2 saying, in an aside, that he never thought being president would be so profitable. It's hard to find a single senior official, from the president on down, who treats public office as a grave responsibility rather than an opportunity for personal self-aggrandizement and profit. Proof of that is the volume of the S&P 500 stock ETF purchased before Trump's announcement that he had peace talks with Iran to end the Iran war. 15 minutes before the announcement, tens of thousands of shares were purchased by someone(s) but only those close to Trump or his upper management are guilty of insider trading. Here is a graphic of the S&P ETF with the tick-up in volume in advance of Trump's reveal and then the large increase in value of those purchased shares. This huge spike in stock market trades and a similar drop in oil futures must have been made by someone, or some people, who had prior knowledge of Trump's announcement. The very definition and evidence of insider trading. Here is the link to the graphic; https://ci3.googleusercontent.com/meips/ADKq_NaZGwZzxomNhTFTqRJm9X5jRAa6XzEVloUGZJmIQE4HsXt2FdOTou-ruLVMWn92GKsCA286USjJI2icHKuC0BnzraNcgwFM0gqDsMIY3d2c7QWqa_h1tSppDoTZWUDvwoqbXL6MltKHNIbKiP_h1IEoioWvOFqUmujXF8WYIJZm35ogH1ULE_YIMBiiywXxREUmH0iw8y6GqOstlBvD8U01nEhCkLCSLXVcdL8rtmCT

			w_Y_u_sPWiLxSNoFuGsH32eAk25_1g2WJlgTK5NvbhUNcRE7n6xCaFxiWiZpXpCKGQa7NpAn9oLJf8CXCSn5j1FMASg=s0-d-e1-ft#https://substackcdn.com/image/fetch/\$s_!9Shj!,w_1100,c_limit,f_auto,q_auto:good,fl_progressive:steep/https%3A%2F%2Fsubstack-post-media.s3.amazonaws.com%2Fpublic%2Fimages%2F47b04ee4-e763-455a-acfe-a63164100aca_733x563.png It amounts to the someone(s) making over a thousand wagers (futures) worth over 150 million dollars.
Sent	03/23/2026 4:24:59 PM	0123456789	How does any issue or idea be good or bad or right or wrong? One way to know what is good is to have moral compass, avoid corruption, and for politics, and support the best ways for average citizens to improve their wealth, life, liberty & pursuit of happiness as they are America. Our country, as laid out in Declaration and Constitution is for that, and the word corporation does not exist or appear, or mentioned in the constitution and should not be given the status of American citizens who can contribute to elections and parties while foreign countries and corporations can not. What is the difference between an American corporation and a foreign one. No difference. Many American corporations have their head quarters and plants in foreign countries. From Google chat box, gemini: "It is illegal for foreign governments, corporations, or individuals to contribute directly or indirectly to U.S. federal, state, or local elections." I remember about all the heads of fortune 500 companies each meeting with Trump before the last election and coerced, extorted tens of millions from each for himself and his campaign. This sort of corruption goes on and is wrong even if there is some positive goal, Maduro in jail, or murdering family of Iran leader and leader himself. Why would not the Iranians not want reparations from the US and a requirement that Trump be executed.
Sent	03/19/2026 4:00:24 PM	0123456789	Artificial Intelligence, AI: Republicans have black listed Antropic AI company because Antropic forbid their products be used to surveill citizens or in autonomous drones/bombs. Another fact is that huge sums are being spent on AI by governments (especially the U.S. and China) and by private technology corporations. A lot of the dollars are spent on computing, but a lot is spent on lobbying congress to not regulate AI with safe guards that would keep government from making any laws to regulate AI. Republicans have favored no regulations as they are profiting from the success of AI companies, mostly by investing with insider information. I hope that those in this administration who are corrupt are prosecuted and even if democrats gain control, it is likely they will let them go, they are too kind. Beside surveillance and self thinking weapons i am not sure what form AI will take, but autonomous weapons are

			enough to worry about.
Sent	03/16/2026 8:49:32 AM	0123456789	Think about Iran and the Iran war in terms of the past. Few westerners and journalists have been there, information comes from media and there is no way to know what is true but we can reference what happened in the Iraq war. Like the Iraq war, fought for a false reason; that Iraq had nuclear, chemical and biological weapons that threaten the US, it looks like Iran war was started by US for false reasons as well, imminent nuclear attack. There was no nuclear or weapon threat in Iraq as it did not and does not have a nuclear weapon. How do we know such a secret thing? Iran has had its major cities bombed by more than thousands of hits on infrastructure with thousands of civilians, their houses, cars and possessions destroyed as well as military infrastructure, with no insurance and the present leader of Iran had his family and father killed by the bombing. If there is motive for using a nuclear weapon to stop shipping or revenge, Iran would deploy it. That leaves bad regime, and oil control as reasonable reasons for warring with Iran. Usually US does not outright make war or attack bad regimes like North Korea, China, Russia. Starting with Venezuela, and now Iran, air power is used to attempt regime change. In the past, US has used CIA and the other dozen US clandestine agencies to topple regimes in Costa Rica, El Salvador, Chile and Honduras where such past CIA activities have been admitted. I won't mention Granada where US changed the regime, and Cuba, where US attempted, but failed to change the regime. Is there another reason for starting Iran war? Could be US is run by a dictator who has dementia and is followed by acolytes who run with his crazy directives, or he thinks it's worth it in \$ to acquire the oil of Iran as pay back for past ills, like Iran hostages and calling America the great Satan. Is this what it felt like at the Bay of Pigs? Oops, I mentioned it.
Sent	03/09/2026 1:17:06 PM	0123456789	Paramount, CBS, CNN, HBO, Comedy Central, and TikTok are now Trump propaganda organs along with Fox, newsy and news one. There is nowhere to go and not be influenced by Trump propaganda. Trump represents the collection of large corporates or collections of corporates who collectively lobby for less taxes for corporates and less or no regulations or no antitrust or no expenditures by tax payer dollars that does not aid corporate industry and slow our, the bottom 90% accruing of wealth, real stock market and low unemployment. For example, if too many are looking for too few jobs, salaries are bid lower and profits are higher with respective bonuses. When laws are passed that hinder union or collective bargaining the power of workers, salaries are reduced. Workers get higher salaries and benefits, and work environments

			when there are unions or collective bargaining so the corporate lobby is opposed and bribes/ingluences law makers to make laws, like right to work laws, which should be called supress wage laws. How clever to name the law so as to make chumps out of the magats. As for the new Iran war and middle east, I once wrote about how it all began ... with the help of X-anon web site and web (in)sight ... Republican Bush I, the first Bush administration, in return for campaign contributions, hired/named Ambassador April Glaspie as ambassador to Iraq, and she is widely blamed for allowing or even encouraging the Iraqi invasion. The New York Times on September 23, 1990 quotes Glaspie (as said to Saddam), "We have no opinion on the Arab-Arab conflicts, like your border disagreement with Kuwait. Right after his war with Iran Saddam is hoping to grab Kuwait's. The next day, Saddam Hussian invades Kuwait. Glaspie was not the right person for that job, after the prestige, pomp and circumstance is over, there is actually a job to be done.
Sent	03/04/2026 9:07:21 AM	012345 6789	When I came to the weather service in 1985, once living in Florida, I had less than an 18-hour warning for a hurricane approaching, and it took more than that to evacuate population. By the time I retired in 2021 there is 8 day lead times. All thanks to science improvements in the modeling. Since the 2000,s people have been put in charge of NOAA, the weather service, and their incompetence filtered down to middle management administrators who came from business environment, not science. What then happens is the emphasis is on how leaders appear to public, optics, and money in budgets are driven by politics, personal gain, not science. The result for science base federal agencies like the weather service and NASA, is slowing of science progress and the wasting of tax payer dollars on misguided visions from incompetent administrators who stifle decent, causing federal agencies to look bad and do bad job. Good folks, dedicated folks won't work there and find a place outside federal service, and then the public wonders why the government works so bad. But the weather service made a miracle out of its mission to predict weather operationally before republican hatred of civil service because it helos the lower 90% lowest wage earners and top income oligarchs are greedy for taking over federal agencies. Putting terrible administrators to head the other agencies from military to SEC, Dept of Labor, Budget Analysis to hide inflation figures, DOJ to cover up Epstein files and other prosecutions, Homeland Security, Border Control, ICE, all have top administrators who professed hatred of the agency they were put in charge of. Then the public loses confidence in, say, the Department of Labor, that's perfectly fine. If Congress slashes its

			funding, so much the better. Every department and agency of the federal government has become a back-stabbing rat's nest. Total pandemonium. Career staff fired or against political appointees and vice versa, political appointees against other political appointees. Blatant misuses of taxpayer dollars, self-dealing, conflicts of interest, sexual predation, abuses of lower-level employees. This is what you get when you have a president and White House staff who don't give a rat's ass about who they appoint to positions of power except for their loyalty to Trump and how they look on television. Along with Republicans in Congress who don't oversee these departments because they couldn't care less.
Sent	03/01/2026 8:35:22 PM	012345 6789	... this check and balance, or the procedure for running and creating the American environment, is like the way science works. In science, as in politics, economics, and law making there is a procedure to follow. Since any group or individual is composed of humans who can muck up, make mistakes, or not have good intentions, or is corrupt, we follow the procedure, the proper method for proceeding. If bad science happened, like the earth is flat, as is true for short distances, like in building a level house, the curvature of the earth need not be taken into account as it won't make a difference. But build a bridge the size of Verizano bridge (3mi) and the suspension towers are set on slightly different angles from their flat surface and if not set that way, the strain and stress would bring the bridge down. Anyone can access the science, do the experiment, and confirm past scientific theories or not. The results are tested to confirm or deny. That is the reason for following the constitution and applying checks and balances to American politics no matter who is in power.
Sent	03/01/2026 8:17:56 PM	012345 6789	The news today is Iran, what will happen, and why did the US attack Iran and not get Congress OK according to US Constitution. A lot of Magats say he Iran leaders were a bad guys and deserved their fate, and that might be the case, but there is a big butt here: America, the system, economics, politics, and policing, everything is based on a procedure. That is the goal of America is laid out in the Declaration of Inependance and the means to achieve that goal, or the rules by which America will achieve the Declaration's goal is laid out in the constitution. The rules and laws by which rules and laws will be made and carried to accomplish what is in the constitution. It is not the person or group who decides how the laws will be made but it is the procedure that creates the laws and environment that we live in. The system described by checks and balances.

Sent	03/01/2026 12:13:52 AM	0123456789	Since we were students, when I was in grad school and you were in Rn school, I have ranted about the disparity in wealth, which is caused by the disparity in federal taxes. It started with Nixon, newly republican empowered, at first trying price and wage controls with 10% tariffs, which did not work. Wages were unchanged, but prices continued going up. The inflation then of 4% would shortly turn double digit. In those days, the ultra wealth tax bracket was 57% with fewer tax deductions than today. I have ranted about the decreasing tax burden by the ultra wealthy and ultra wealthy corporations and their owner oligarchs. But it is not only inflation, tariffs and federal taxes that the ultra wealthy have manipulated magats and the rest of us to accept and pay. It is the Payroll taxes. Payroll taxes in the US are mandatory, employer-withheld, or employer-paid taxes on employee wages used to fund federal social insurance programs—primarily Social Security and Medicare (FICA), along with federal/state unemployment (FUTA/SUTA). They are distinct from income taxes, typically totaling 7.65% each for employees and employers. Self-employed individuals pay both portions (15.3% total). I am not yet talking about state and local taxes that are strongly regressive, meaning the higher your income, the less, by %, you pay. The ultra-wealthy have used their wealth to achieve immense political power. And the failure to tax them effectively is reinforcing the vast accumulation of wealth at the top.
Sent	02/19/2026 9:07:52 AM	0123456789	The Supreme Court did not determine that immigrants, claiming asylum or other reason in America, are breaking any law, and the court acknowledged that they are entitled to due process with a judge and court to hear their case. A jury is not inpaneled as asylum seeking immigrants are not citizens. The 10 million immigrants that arrived in 1980's and the total 12-14 million believed to be in US now are either DACA children (allowed to stay and work by past administrations), or those waiting for asylum hearings to complete, each here with a story, but Trump administration has declared them all to be susceptible to deportation/incarceration without due process, and has taken away (10s of) thousands. The (Magat supreme) court has said that such wrongs/violations of due process can be brought to the court on a case by case basis, and when they are (good and ready), they will rule. The Magats have kept immigration rulings to a minimum by slowing the asylum process with less judges and budgets to make the system look broken. With large backlogs they have been successful. Even Dems think that immigration is broken, a Magat propaganda success. Immigrants are needed to fill jobs, the declining birth rate, contribute to social security and Medicare. They are the same as us, immigrants, for me

			1898-1904. We are all immigrants and America was once, but should be a melting pot. As immigrants are not rapists, murderers, muggers, the worst of the worst as Trump calls them. It's hyperbole propaganda and wrong to demonize a class of people. Some magats said the Latinos are taking my roofing, cleaning or landscaping job, but those same folks never had a roofing job. It is scary that a large number of folks would think that there is something wrong with anyone who is Latino. Of course, Germans thought something was wrong with all Jews in 1930's Germany, or that anything was wrong about an email server while working for the federal government. I had one on my Linux govt computer that I set up, as did Hilary Clinton. She was not convicted or charged, which is more innocent than a felony conviction. Who is the criminal here.
Sent	02/09/2026 11:12:44 PM	0123456789	Why would I be against deporting immigrants who entered US. First, when did they enter, how, etc. Constitution says immigrants who land on American soil are entitled to due process with a judge and court to determine if whether their asylum request is granted. Few cases are granted but the line is long to get to court and for decades the number of courts and judges have been kept low by Republicans, the idea is to break the system by not allowing cases to be ejudicated. when it gets so bad with millions of immigrants waiting for years then Republicans can declare a broken system and apply draconian or illegal remedies. Before 2000 about 5 million undocumented immagrants in US, between 2009-2010, mostly during Bush W administration, 12 million. for 2010-2020, undocumented population from Mexico in US fell by nearly 2 million, while the population from Central and South America increased by ~900,000. 2020-2025 there are between 11-14 million depending on who is asked. So, most of the South and Central American immigration to America happened during Bush administration. During WWII the ships of refugees fleeing Nazi concentration camp were turned away from US by a similar no immagrants allowed policy. Those folks were returned to the Nazi and killed in the camps. That realization, gave way to a more open US immigration policy. Ecomonically immigration is good, as you and I, and everyone else benefited from past immigration as we are here. We need immigrants to fill in unskilled unemployment and pay into social security, which immigrants do. Also, from many nations the most clever, wealty or ambitious are the ranks of xforeign immigrants as that is what is needed to get to America and pass the arduous immigration process. Only the intelligent, skillful, and perseverance gains one access to US. No one can miss the gestapo tactics with ICE. Until Trump, there

			have not been masked, ununiformed, secret (no identity name or badge number) police in the US in recent history. My view is it is time to confront them, the ICE police, with clandestine, asymmetric violence. The same way the revolutionary founding fathers did it to King George, and had the tea party, as in the way the Magats got started. Masked, unidentifiable, police arresting without a judges warrant, and incarcerating in foreign or domestic prison either with or without due process, without end, at great cost to US taxpayers (for the prisons), and great cost to the families split up causing cruel and unusual anguish, loss of income, completely disruptive to local and American society. So far, the grand cover- up is in, as the agency responsible for prosecuting crimes committed by the ICE police has hidden and destroyed the evidence and created false senerios calling those arrested criminal and terrorists. Except for a minority of Magats, no one feels comfortable with Trump actions here that I know. Today there's broke that a 100 new prison contracts have been let/ purchased by ICE, each one of the prisons to hold many times the inmates than any existing federal prison. Are these to hold the 10 million immigrants that are in the US now, or are these prisons, that many are called gulag, are these prisons for anyone who does not vote for republican candidates in the next election.
Sent	02/09/2026 7:53:52 AM	012345 6789	So. Therefore: Do tax cuts pay for themselves? No Why do Republicans only care about deficits and debt when they're not in power? They don't care about deficits and debt. They care about trying to prevent Democrats from spending money on helping people. A third of voters continue to support Trump and consecutive republican policy.
Sent	02/07/2026 8:06:34 PM	012345 6789	There are 5 million bettors, not 50 million.
Sent	02/07/2026 7:57:02 PM	012345 6789	As the American republican free market reigns, I have done ok with stock market and real-estate gains. As a civil servant for 40 years, I wanted to make my contribution to a better civilization without directly supporting war. With my interest in how nature works and prediction, science was logical, and my skills could be good in mechanics/dynamics thus, weather prediction was logical for me at the time. While at NASA and the weather service, I invested some of my 401k dollars in S&P, there is little choice allowed as a federal employee, by law, that is, I can only buy investments with my retirement money like the S&P index or a few other similar. As a federal employee, one gives up a number of freedoms, like running for political office, and i can not use my retirement dollars to buy a single stock of my own selection. For example, I could not

			purchase the shares of stock of Palantir, Facebook, apple, or google stock. However folks in the executive service, that is, the president, his cabinet, and white house executives, as well as congress, judges and their management can, especially when they are in the room where federal contracts are awarded, for example, with billion dollar Navy contracts, which was the case for the company palantir, so its price went up 300%. I wonder, and you might also wonder, have the congressional committee that bestows grants on private companies for contracts and knew that the major stock holder was also the largest and record holder for contributions to Trump and republican party. Still, the S&P has been up 16% in the last year (not counting today). Anytime there is double digit increases in an investment, I feel pretty happy, and since it has been that way for the last decade (not counting pandemic), that is a rare event. For example, this from Chtgpt: "FAANG stocks (Meta, Amazon, Apple, Netflix, Google) have outperformed the market over the last decade, with an estimated 26.6% annualized return compared to 10.6% for the S&P 500. " After putting away dollars in the S&P federal retirement plan there is not a lot left for investing but I could not invest directly in any of the fast risers. The insider trading is the problem in the current government. It is like letting the horse jockey bet on the horses, or encouraging the sports player professional allowed to bet on his team. Thinking of that, sports betting, on average in 2024, sports bettors bet 50 billion on Fnduel wagers, FNduel keeps 6 billion as profit, it pays 1 billion in taxes, thats 16% while I pay 32% federal tax, and fnduel gambling pays 1 billion in advertising and a billion on research including setting the algorithms with the remainder, 40 billion returned to bettors. This means that bettors get 80 cents or 80% an every bet dollar they bet which is simaler to the return on horse racing and other casino enterprise. There are 50 million fnduel users losing 10 billion per year, so thats 10,000 million/5 million= \$2000/per person per year losses. If you ask the bettors, they will all say they win more than they lose. Far for me to take away the entertainment value.
Sent	02/04/2026 9:36:25 AM	0123456789	This is the worst year yet with cuts to social security, Medicare, and welfare. 99% of American wage earners have lost wealth, get less value from health care for higher cost and longer wait times at docs office, and less dollars given for welfare programs, like dissability insurance, veteran admin medical care. The top 1% income earners have increased their wealth substantially, for example, purchasing the S&P was 16% over the last year and Palantir (PLTR) stock has surged following strong earnings, driven by a 137% year-over-year increase in revenue". Peter Thiel, supporter of JD Vance and Vance and MTG,

			and Miller and most other Trump supporters in high places responsible for billion dollar federal contracts to palantir Corp and stock have made millions on the (300%) stock run up. All denied there was insider trading even though there wealth and trumps wealth has exploded exponentially since taking office. His and their gains are felt in the losses to the wealth of the 99% lowest wage earners, 99 out of 100 magat and democratic voters. So what do people say is the reason that they prefer a leader that makes there lives worse, financially, dumbstruck down their schools, sets internet tools to harass anyone who makes headway or notoriety in opposition, uses gestapo tactics like administrative (meaning no, or no judge issued warrants for incarceration or arrest) proclaims the nationalization of elections, stops federal abortion, has been (raped) with teenagers in NY and some island with epstien enterprises, and Ben convicted with felony level sexual attacks on one or more unwilling women. Trump supporters have to do a lot of denial to think that all these condemning traits are the product of fake news. They claim there was no holocaust, that.jew were not killed, or that there is no glass ceiling, not a republicN voted for equal rights admendment, and not one republican showed up to the congressionalhearing on ICE killings held yesterday. And all this over immigrants who under current law and US constitution are entitled to an asylum hearing before a judge and and due process. If you can not live be the laws of the land, like born on US soil, then US citizen, then move elsewhere. While I am ranting about this I note that corpoations and republicans are no longer claiming that they will move to Europe to enjoy lower taxes than in US as the corporate US tax on profits is lower than elsewhere. Corporates moved offices to Ireland to enjoy a 1% tax but after a while the EU increased the rates.
Sent	02/04/2026 8:41:03 AM	0123456789	The deficit continues to grow, now 6% of GDP or over \$1 trillion per year adding to the US debt of \$38T. It is a good thing that these high numbers do not seem to matter. I remember Republicans trying to kill social security and Medicare and any welfare because the deficit was up to 500 million during President Carter's administration even though the big increase was in military spending. \$500 million is \$0.5 billion, 1000 million=1 billion and 1000 billion=1 trillion. Republicans have cried wolf as deficit and debt has risen so long Democrat's controlled the government claiming spending on Medicare, social security, and welfare are too high. For Republicans, the has never been a military expenditure that they do not support or war that they would end, from Vietnam to Afghanistan. Or corporate tax cut and increased corporate deduction, off limits to salary income wage earners. Recept for the 1 in a

			hundred top income earners no one should vote for Republicans as their policy actions have lowered the wealth of 99% of Americans. So why does the majority of voters in states not on east and west coast lines consistently vote, since 1970's for republican party that has removed the wealth from 99 out of 100 citizens? The continued increase in wealth inequality is proof of this.
Sent	02/04/2026 8:05:03 AM	0123456789	It's true, I think, and have always thought, that interest rates were kept too high, for example, some years ago I was upset with the austerity measures of Europe and economic deficits and high unemployment problems in Europe. So I was for lower interest rates here and abroad, at least a little lower, either that or a cap on mortgage and credit card interest rates. Checking this, we find, "record profits for banks in 2024–2026 driven by interest income and a rebound in investment banking. " Banking has had record profits in last years. I find myself agreeing with Trump administration to lower, a little, the interest rate. Then, I am in favor of not taxing the income from tips and social security which Trump has advocated. Of course, I also would have a higher corporate tax rate than the present 22% with the deductions/depreciation allowed for corporates but not for salary income. The tax on unearned income is 15%, half of salary income and the only cap/limit is not on high interest rates for borrowed (like credit card) money (called usury) is a cap on social security taxing: from chtgpt "the maximum amount of earnings subject to Social Security taxes (the taxable maximum or contribution and benefit base) is \$184,500. This cap, which is adjusted annually based on average wage increases, means only earnings up to this amount are taxed, while income above this threshold is exempt from the 6.2% Social Security payroll tax. Trump is not in favor of any of that. I note Democrat's went along with the no tax on tips, which is only a tax reduction for those who get tips directly, like pooled tips do not count. Republicans continue to fight against removing social security cap, raising corporate tax rates, republicans want to lower corporate profit tax rates to zero, and the unearned tax rate for dividend and capital gains income which is favored by Dems.
Sent	02/01/2026 6:28:37 AM	0123456789	In each of the sensational or notable ICE interactions there have been coverups to leave the administration blameless. It is like we are watching a movie of WWII Nazi gestapo tactics with emphasis on cruelty. At the same time stock markets are up at near record levels and the price of gold is over \$5000.00/Oz and even though there have been grudging cuts in the federal reserve shoet term interest rate the bond yields have not fallen and the dollar has wakened. As high as the US markets have been the European and Asian

			stock markets have been higher and with the US currency weakening the gains from international stocks has been off the charts. I think the reason is that large corporate tax cuts and the top 1% income earners are buying stocks here and overseas which is shown by the trading volumes and currency shifts. While there is more corruption in US now corporately and wealth transfer from wage earners to the top 10% income earners Trump and Relublicans, I find, are sounding right on a number of issues so it must be election time again. I find myself supporting republican conservative Magat positions. Crazy, here they are ...
Sent	01/24/2026 6:20:08 PM	012345 6789	Admin claims the woman shot in her car is a terrorist. This and the 3000 federal troops in Minnesota using masks and automatic weapons without allowing themselves to be identified is un-American. Remember how this started. A video of childcare facilities was taken by a young Magat political operative, claiming a number of childcare facilities were fronts, (with no children) steeling from the government by the childcare company not spending their federal subsidies on childcare. Turns out, not one of the facilities videoed was corrupt or embezzling. In 2019-2021, 5 years ago there were almost 50 people arrested or convicted for a ten year period of corruption where they billed and bilked the federal government for childcare/Medicare subsidies totaling tens of millions of dollars out of the federal subsidy program which gave Minnesota over 200 million dollars in subsidies that was indeed used for childcare, legally, and rightfully. For example, the state of New Mexico received over 200 million for child care subsidy under the same program and 10%, that's 20 million was deemed lost in fraud in New Mexico. In Minnesota the embezzlers were caught, and their trials went on through 2024, with convictions for one, near 20 million, she was not a Somali, and the total convicted near 50 million. Turns out many of the participants convicted were some Somalis (black). This was not different from fraud in Florida or other states. For example, 15 billion dollars was lost to Medicare fraud over the states during the period. Corruption and fraud in federal programs is bad, and we prosecute those involved. We do not send in masked, unidentified hitler brown shirts to, as Trump and Miller say, "fix the chaos, and inserection."
Sent	01/14/2026 1:31:45 PM	012345 6789	... saying the Mom was a terrorist and ordered the FBI to find dirt on the family of Good, that could support Trump actions, parroted by Vance and Kristi Nomes for an offical cover up of the incident. Shown today were a number of knock downs and vicious assaults and beatings on two other folks, one of which was a citizen, and other, both pulled from their car so there was not the possibility of

			resistance. Anyone would cringe at the treatment. There is no recourse here, appeal or due process, which in the past made America different from other nations like in North Korea, Russia or China or Nazi Germany. The administration has taken over the investigation, hiding evidence they know would be detrimental if it was public.
Sent	01/14/2026 12:03:09 PM	012345 6789	My earlier posts pointing out gestapo tactics by Trump to keep power for himself, K-Street lobbies of the fortune 500 that have invested large sums, or have been extorted by Trump to pay for the media propaganda brainwash of American voters, is now the accepted reality. Trump said today, the caps are his: FEAR NOT, GREAT PROPLE OF MINNESOTA, THE DAY OF RECKONING & RETRIBUTION IS COMING". I believe the reckoning & retribution is coming for Trump and his entire cabinet and VP. I know in a year or so, the Alzheimers dementia will cause Trump to be replaced by Vance and Dems will be too kind and not prosecute Trump. There are many democrats in name only (DINOs) like Shummer who comes off very weak with his responce of "... send a strong letter... " against a Trump and Republican secret police force unleashed on American cities, where anyone can be caught in their net beaten or murdered as Good was. If ou or I look Latino or black or be a citizen, and in the wrong place, you are at risk. If it were not for the cell phone videos the Republicans would have covered up the affair, saying that the mMom
Sent	01/13/2026 3:14:45 PM	012345 6789	Today, some talking heads have said about Trumps visit to Detroit, MI, that he intends to lower credit card interest rates with a cap of 10%. For years, 20240507 and 09, I have been saying that interest rates were too high and should have a cap. Here, I quote myself from 20240809, in this msg file, "20240809: "Mostly Republicans driven by banking lobby wanted to stop any cap on credit card interest rates but a few or one republican did promo×"te the cap. Bush W, in a campaign speech, said he favored a rate cap, but when the senate passed a credit card cap at 16% he said he would veto it and the bill died. Trump may get votes by capping credit card interest at 10%, for a year, but no dem thought of it ot suggested it now. I think Republicans might pass such a law if it was for a year, as long as it reverts back to higher rates after that, or Republicans would not allow a cap to pass. Dems should have got it passed to cap high interest rates as it once was, and they should be out there showing it is a dem idea.
Sent	01/12/2026 11:28:18 AM	012345 6789	Trump through Kristi Nome has introduced gestapo brown shirts as in WWII to the United States of America. I call them grey shirts as they were wearing them

			when these thought police kidnapped participants at protests in Washington state and Oregon. Kept them from the protests and let them go after 3 or 4 hours from unmarked vans. This alone, as well as other violations of US constitution, which are rampant, Trump should be impeached, prosecuted, and incarcerated for these many offenses. I am in favor of civil war to end the tyranny of this republican magat government. There should be retribution for its architects and participants as there was for the equivalently evil government of Nazi WWII Germany. History has its eyes on the administration for violating the ideal of America. Tyranny government is one where power is wielded oppressively, arbitrarily, and unjustly by a single ruler or group, disregarding laws and individual rights, often characterized by absolute authority and abuse of power. The Declaration of independence says people's right and duty to overthrow a government that becomes destructive of their rights, and long train of abuses" necessitates rebellion.
Sent	01/08/2026 8:01:59 PM	012345 6789	Only a year into this administration, Miller, Trump, and Magat Republicans, continue and accelerate the movement of wealth to the top 10 and 1 percent income earners, and there is less wealth for everyone else who, by the way, is us and our families. After the Minneapolis murder by ICE, it is clear to all that the masks, weapons, secrecy, harassment, trumped up charges for arrests, detention, beatings, and incarceration in and outside the country of would be undocumented workers and others like some American citizens and green card holders, and the costs of the ICE actions, so far, at 75 billion dollars (the cost in the recently passed big beautiful rotten bill) are the Trump/Magat/republican effort to control the population to keep power while inflicting un democratic principals for the purpose of wealth gain and consolidation for a few. Kristi Nome and Trump tried to get ahead of the bad optics and attempted to suppress the woman's murder (her name was Good and she had a child) as Trump and Kristi made up a narrative and attempted to get ahead of the issue and would have Americans believe that the woman was shot because she broke the law, (she was there by happenstance, there was no warrant. Krist and Trump said the ICE agents were attacked as they tried to apprehend her, a criminal who rammed the ICE agent with her car and the agent was hospitalized. If there was not a video that would have been the end of it. Like the George Floyd case, initially police claimed it was Floyd's fault for resisting arrest and left out the part where 3 officers were holding him, one with a knee on his back which caused him to die from suffocation. Not knowing of the existence of the video showing what really happened, Trump and Kristi stated a

			fictitious narrative they loved would be believed by all. But there was a video that dispelled all their statements and exposing that Trump and Kristi lied about injuries to the ICE officer, who is seen to be fine in the video. A neighbor and doctor told that the ICE agent kept him from administering medical help until the woman died. Very cruel and Hitler like. The voters who voted for Republicans and Trump are very quiet and making no comment hoping it goes away and people forget by the next election. I hope not and every one should be voting democratic or not at all. Otherwise be complicit in the end of democracy as we have known it. In Russia, Putin says they are democratic and as well Xi of China.
Sent	01/08/2026 10:09:04 AM	0123456789	Atrocity after atrocity committed by trump administration, republicans, republican national committee, and the Supreme Court for giving Trump immunity. I will send a letter to Alito. He deserves to know that history will treat him and his Supreme Court with retribution, the way we now think of chief justice Tanny, who caused the civil war by declaring that all black people, including those free even in northern free states, are always slaves and can never be free, in his ruling called the Dred Scott decision. Dred Scott is remembered as the worst Supreme Court ruling ever and reviled chief justice. Now, the Alito Court will be remembered as the most partial, politicized, predejuce and reviled Court in American history. Alito has enabled Trump to be immune (1st time) from any of his criminal actions and statements such as condemning Mike Pence his VP, promoting an insurrection of US government, and supporting the ICE murder (check the cell phone video of the murder of an American citizen) where Trump and Kristi Nome, both put out the government trumped up damage control created the lie that a woman was trying too attack and run over an ICE agent, or Trump lying about Venezuela govt takeover deal, and steeling the oil. Beside the Alito Court granting Trump immunity from any crime he might commit, and Alito's court overturned Roe vs Wade. I would also tell Alito that his ruling overturning Roe vs. Wade opinion based on original intent and constitutional textualism is a sham, as he smirks his way through hypocrisy. Alito and his Magats say they are right to undo the Roe vs Wade precedent since the founding fathers did not write abortion into the constitution, but the founding fathers did not write Corporation into the constitution either, so Alito's opinion on the Citizens United opinion, making corpoations citizens, able to sneek around election law and control with \$, large segments of media messages and brainwash voters. In addition, on Alito's founding fathers law thinking, originalism, invoking it only when it fits the Magat agenda, is the

			reading of the second constitutional admendment which says for "A well regulated Militia, ...", in the same sentence as the "...right to bear arms", and there is Alito smirking at the law as he makes up new law from the court bench. Alito also enabled the Trump administration, in many states, to allow ICE agents in, for example, in Minnesota with the murder, and in other states and cities, allowing masked, ununiformed, grey shirts, (like Hitler brown shirts) to carry guns, intimidate, and murder or harass immigrants and citizens. The ICE grey shirts appear with masks on, and weapons that would scare anyone into calling 911 to report aggressive, criminal activity, how does anyone know that it is offical police when ICE agents raid someone's apartment, a dreded home invasion, at 4am. I would shoot them if it was me, and as well if I were attacked in my car. Dems have guns too and the mayor of Miniapolis should have empowered and deputized the citizens to bear arms and rid the state of illegal ICE agents. Thanks to Alito, like justice Tany, Alito will cause the next civil war.
Sent	01/07/2026 11:40:37 AM	012345 6789	So why did Trump go with Maduro's vice president, running mate, and the rest of the government instead of the 70% winner of the last Venezuela election, which Maduro successively stuff the ballot boxes, acording to Trump admin and other nations. Trump turned on Machado because she committed the ultimate sin of accepting her genuine Nobel prize that Trump felt he deserved. The Trump guy is petty, and probably has obsessive compulsive dementia onset for some time now, worse than Reagan was. The VP offered the oil reserves to Trump and betrayed Maduro to gain power, and Trump took the currupt deal. On another topic, I have thought that Trump and Miller control the radio talking heads, TV news Fox and others by buying ad time to keep their voices (propaganda)flooding the air waves and digital media. I remember hearing Bongino before he was number 2 at FBI, he was a talking radio head who I listened to once, driving through Pennsylvania. He pushed conspiracy theories like the Jan 6 riot was caused by democrats and antifa instead of Bannon and Miller (before they were pardoned). It is like the FBI entrapped the Jan 6 rioters and made them break into the building, the Jan 6 rioters were forced to break into the building at the behest of Democrats and antifa black people, the roiters, convicted and pardoned by Trump, as they were sight seeing and great patriots, so says the White House web site today on a new page. Bongino, this week, on Fox News, said "I was paid in the past, Sean (Hannity), for my opinions, that's clear, and one day I will be back in that space — but that's not what I'm paid for now," said Mr. Bongino. Meaning that he states the conspiracies that he is told to deceminate not what is true. That is what has

			happened across the states with Clear channel and Sinclair broadcasting taking over all content. Between Fox, newsy, one, all finance by the republican national committee run by trumps daughter in law and other acolytes of Trump & miller.
Sent	01/05/2026 10:52:06 PM	012345 6789	Flash from my X-anon web site or my own hunch on the kidnapping of Maduro, is his Vice president, her name is Delcy Rodríguez, wanted to run the country and she played ball with CIA and made a deal with Trump, and told him how to get to Maduro in return for US access to oil. She betrayed Maduro for her own gain to be top dog, to become president with control of the Venezuelan oil. No doubt this is classified news that she told cia how to find Maduro where they slept and thwart their safe room. Interesting, that Trump and others decried that Maduro stuffed the ballot boxes and said Maria Machado won 70% over Venezuela vote. It is like when Reagan, was running for president to make Carter, then president, look bad by negotiating with Iran behind Carter's (US) administration's back, for Iran to not give up American hostages until after the election. Certainty that was treason as the Reagan administration was not yet elected, but they promised Iran a better deal if they waited to release hostages so Reagan could win election. The soon to be CIA director, Casy, was behind it. Years later Casy, as CIA director would secretly sell arms to Iran for dollars to finance Contra rebels in a CIA financed money for drugs and divert profits to fund the Contra rebels in Nicaragua by selling drugs there and arms to Iran, defying Congressional bans (laws). Worse is the arms sold to Iran for millions of dollars were poor quality compared with what was advertised. I think it was part of negotiations that Iran was reimbursed for past arms for dollars that were. Reneged.
Sent	01/01/2026 10:19:10 AM	012345 6789	Why are people in red states supporting Magat ideology against their own interest? Why do magats think education/college is not worth it, or why does it seem that Maga Trump supporters (magats) support lower taxes and tax breaks to the top 1% income earners, or the closing of National agencies, NSF, NOAA, NWS, the OK Severe Storms research center, in MI, thr Great Lakes and anything research, like cancer (NIH) and nuclear research facilities, and firing civil servant scientists and staff that work there? As wealth is flowing out of all people who are not million or more airs (the below 90%-99% wage earners) to people that are many millions wealthy (top 1-10% and above income earners), like billionaires, a 1000 million, and a trillion is a thousand billion. For a median/average family, the Cost of participation in the economy is roughly or should be, \$50,000-80,000 which is what a median income ranges in

			red states. Median income of 80,000-100,000, is in blue states (2024) yearly salaries. When the economy stopped for the Covid pandemic, the "tax" of paying for child care, restaurants, every day stuff, like groceries and produce, housing cost, clothes, and rent increases, were repealed because almost everyone stayed home. Families earning \$80,000 felt richer—not because they earned more, but because the leak in their budget bucket for child care, education, housing, gas and autos was plugged. For many, income rose thanks to the \$600/week unemployment insurance or federal payments. For those whose income stayed flat, they felt richer because the many costs were avoided. Then they see their neighbor at the grocery store using a food subsidy (EBT or SNAP) credit card, while they put items back on the shelf because they can't afford them. They see an immigrant family receiving emergency housing support while they face eviction. They are not seeing poverty. They are seeing people getting for free the exact things that they are working 60 hours a week to barely afford. And even worse, even if they don't see these things first hand... they are being shown them in the media. The anger isn't about the goods. It's about the breach of the American contract. The American Deal is that Effort equates to financial Security. Effort brought one hope or is it hope brings effort. But because the real poverty line is closer, for a family of 4, to a yearly income of \$140,000, a great effort no longer yields financial comfort or security or progress; it brings risk, exhaustion, and debt! The poverty line is now about \$35,000 adjusted for inflation.
Sent	12/22/2025 8:23:14 PM	012345 6789	Today on NPR they show Trump and Republicans are closing NCAR, that's the national center for atmospheric research, in Boulder, Colorado, on whose fast computers I did the calculations for my PhD thesis, and interacted with the great scientists of that time when we were back in Michigan, starting in 1972. Trump is closing it because in Colorado refused to release Tina Peters, a former County clerk, who was convicted and serving a nine-year prison sentence for illegally accessing voting machines after the 2020 election. A Republican, Peters was pardoned by Trump, but not charged or convicted in federal court, only in Colorado state court where Trump has no jurisdiction. So Trump administration is holding NCAR as a hostage. Very evil.
Sent	12/20/2025 10:25:06 AM	012345 6789	I meant the Meca of weatherman. Thanks to the speller.
Sent	12/20/2025 10:21:42 AM	012345 6789	Skipping over the over the top events of the last weeks, like placing trump's name on buildings, like the Kennedy center, which I have been to a number of

			times, but I attend the Baltimore Symphony Orchastra (BSO), a much better orchestra, or the institute of peace building, clearly done by an obsessed man with dementia. That is who is running the country. Friends and colleagues of mine from foreign countries feel that Americans have become stupid. I used to defend Americans by pointing out the implicit filter on foreign immigrants, that they are the most clever, ambitious or wealthy or all the above to make it to the states at all, leaving the less smart behind, stuck in their shithole country, the words of our president. I now admit they are right. At least a 1/3 of the electorate and half the voting public are, as they say, not voting their interest in a democracy, thus becoming conned chumps. Many years have past but Mitt Romney, a Republican, who was a Utah Senator from 2019 to 2025 and presidential candidate wrote an editorial where he said Republicans needed to fix the federal tax problem of estate taxes, capital gains taxes, and social security taxes, real estate taxes pointing out that the wealthy, like him, end up not paying them so the nation does not get the income to pay for its expenditures. If Romney only said these things during his campaign, he would have been president. I did notice that Mitt said nothing about the tax avoidance known as Carried interest, from which Romney made a lot of his money at Bain Capitol where he worked, taking commissions(not taxable under carried interest) for taking over/selling companies by borrowing on their assets increasing their debts so much that bankruptcy occurs leaving banks, employees, and stock holders to pay. I have written about this in these texts before. It is a way for Mitt and others who can invest billions in company takeovers and not pay any taxes. I can feel the media leaning away from the MAGAts and unless there is a new propaganda brainwash the Republicans will be out of power in Congress and a small check on Trump for the rest of his term. Not before a lot of damage is done. Many scientists I know have lost their jobs in weather prediction, they are closing Great Lakes Research institute, the one at Princeton, the Climate lab at Miami (the university of) the Severe storms labs in Oklahoma and NCAR, the mechanical of weather men. A sad day.
Sent	12/18/2025 10:31:38 AM	0123456789	This is an old rant from last week.so much has happened in politics. I was trying to wrap up things that happened in 2025.... This year's politics has brought tarrifs, DOGE disruptions (to science and careers, masked ICE agents grabbing people off the street, bombing boats as if we are at war, increased prices from tarrifs, and war crimes in the Caribbean. Racist statements about some minorities and nations. Trumps obsesive-compulsive actions, clearly not thinking straight, like Reagan was. I have been wrong about the voting

			electorate thinking there would be a landslide against Republicans, and people would vote for democratic policies. In stead eliminating many of Trump's tariffs, busting up monopolies, giving workers more power through unions, raising the minimum wage, and lowering the costs of healthcare, maybe by a Medicare for all law (single payer), reduce housing costs, subsidized childcare, and alternative energy (solar cells) and affordable or subsidized tuition. No republican congress people have ever voted for the above, and Dems favor them all. Why would anyone vote for Republicans. My taxes went up, almost doubled over the last 10 years. Why do folks persist in supporting the Republicans. He has pardon dozens of felons, evil people, and some guilty of rape (any adult with an underage teenager), Yes, Trump is one.
Sent	12/09/2025 1:10:48 PM	012345 6789	I have returned to Maryland for the winter. Some family that lives all year round in Northern Michigan said we got out just in time to avoid the major part of snow and cold. The Thanksgiving we had was very nice with a lot of family. Since Cirrus was staying in the old part of the cabin while she visits with us, that does not have forced air heat, heated I used an electric heater and kept the fireplace going. I will take you their someday. I chopped and split a lot of wood for it. When weather is in the 20F it takes a lot more to keep it warm. We had two snow falls each 4" near the lake where I am but each a foot inland, on and after Thanksgiving. Glad to be back in no snow Maryland with 40F. It is single digits back there now. The no snow season used to end in Columbus to Veteran's day but in the last 10 years it has extended to the end of November also being warmer. So, some places benefit from global climate warming. There hS even been a (record) summer high temperature of 93 a year or so ago.

I have always felt that the Heritage Foundation was a fraud presenting itself as a research think tank making policy. I have mentioned this in previous posts. From the year I started at NASA in 1980, It has always been a propaganda producer instead of a think tank for policy or a research institution – a scam that worked for a long time. Heritage’s problem now is that its original scam was designed for a different era — a Reaganesque era in which republican operatives could discreetly leverage bigotry and intolerance to elect Republicans, who then delivered deregulation and tax cuts. Heritage was an

			integral cog within in the convince good people its good to be mean and cruel scheme, giving respectability to policies that were in fact regressive and discriminatory, and overwhelmingly to the benefit of the wealthy class. Telling lies on behalf of the wealthy isn't enough for the MAGA era. To be a right-winger in good standing you also have to be a sexist, a racist, and an antisemite, while promoting Q-anon and other conspiracy theories.
Sent	11/13/2025 11:34:49 AM	0123456789	The Dems were making little progress before the shutdown to keep the snap-foodstamp dollars going and as well, reinstating ACA subsidies, killing both new deal programs, ACA a poor substitute for Medicare for all. The fact is Dems, under their political leaders undertook a stand supported or pressured by supporters and could not maintain the discipline like the Magats do, to follow through on their plan. Maybe you think that this was the plan all along, and the small group of Dems voting with the Magats is a successful effort. This could have been effected without the shutdown on day 1 by the same number of Dems voting with the Magats or the entire Dem party going along immediately and supporting the GOP/Magat dream of ending new deal era legislation. There are some Dems who are DINO's like Manchin and Sinema stopped bidens democratic agenda. It is the weapon of the right (now Magats) to have a secret way to undue Dem egalitarian policies by betrayal in the ranks. The GOP conservatives and Magats have for decades watered down Dem (good) policies until they are unworkable but tolerable by the corporate lobby representing big money, and then declare the policy as bad and delete them as unworkable communist ideas that citizens should not enjoy because it cost money and lowers the ability to get cheap labor. So has it been from the Dino Dixie Dems to the betrayal 9. The Republicans have sought to remove/delete Welfare, Roosevelt's new deal WPA and other work or good jobs policy, and training, demolished unions, remove graduated incom tax, change alternative income tax from a tax on wealthy to one on middle class, substitute a regressive tax from tarrifs, destroy public education by promoting racism, deleting standardize state and Fed run testing in lieu of private for profit control, releasing caps on political contribution dollars giving more power to corporate lobby, water down financial regulation, so the treasury supports ponzi bitcoin owned personally by president!, and neglecting emollient clause. Every common good policy has been attacked, overridden or removed with common good federal regulators fired or replaced with Magats. More careers ruined then McCarthy era. OK! The Dems have the Magots where they want them, we got them now with the public knowing how awful the Republicans are for initiating

			the shutdown, stopping the medical benefits by getting fake assurances that the measures will be taken up or even discussed. So it goes the Dems circled the wagons and could better use that configuration to shoot themselves.
